Validate Device

Are you sure you want to validate the device with Chassis Number C8K-PAYG-f51-bb35-43ee-9708-a3284d701785?

No Yes

The device will be successfully validated.

The one with Serial number 2ea7385.... will be the one we use to bring the edge on board with the request command. Easier than uploading a file from the Cisco website.

```
validator1# show orchestrator valid-vedges
orchestrator valid-vedges C8K-PAYG-A32-6328-4D62-ACE0-E5AF48F22895
